Election/Restrictions

Applicant's election of claims 1 and 2 (Group I) in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 3 and 4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by either of Ueda et al'074 or Ueda et al'720. Both of Ueda et al'074 and Ueda et al'720 teach an apparatus (see figure 6 in Ueda et al'720 and figure 5a in Ueda et al'074 for example) including a container (6) in which molten material can be melted and mixed, a funnel or pouring port (1) for pouring the molten material onto a rotating disk (2) where the rotating disk can be made entirely of silicon nitride (see col. 2 lines 31-37 of either of Ueda et al'720 or Ueda et al'074) thereby showing all aspects of the above claims since the actual manner or method of use of the claimed apparatus

(for fabricating a thermoelectric material) cannot be relied upon to limit claims to the apparatus itself. See in re Casey, 152 USPQ 235 and MPEP 2114.
